ANSWERS TO EVEN-NUMBERED EXERCISES

2. Which command would you give to cancel all print jobs for *printer*?

When you are working with **root** privileges, either **lprm - printer** or **cancel -a printer** will remove all jobs from the *printer* print queue.

4. What is the purpose of sharing a Linux printer using Samba?

Sharing a Linux printer using Samba allows Windows and OS/2 clients to send print jobs to the printer.

6. Which command lists the installed printer drivers available to CUPS?

```
$ lpinfo -m
```

8. Assume you have a USB printer with a manufacturer-supplied PostScript printer definition file named **newprinter.ppd**. Which command would you use to add this printer to the system on the first USB port with the name USBPrinter?

```
$ sudo lpadmin -p USBPrinter -E -v usb:/dev/usb/lp0 -P /usr/share/cups/model/newprinter.ppd
```

10. Define a set of access control rules for a <Location> container inside **/etc/cups/cupsd.conf** that would allow anyone to print to all printers as long as they were either on the local system or in the **mydomain.com** domain.

```
<Location /printers>  
Order Allow,Deny  
Allow from *.mydomain.com  
Allow from localhost  
</Location>
```
